## Summary

---

Frontend developer with extensive hands-on experience in designing, developing, and maintaining web applications across a diverse tech stack, with a strong emphasis on the JavaScript ecosystem. Specializes in creating and implementing high-performance, innovative solutions that optimize efficiency, enhance operational capabilities, and drive business growth. Proficient in delivering effective technical solutions to complex challenges, ensuring smooth user experiences and robust application functionality.

## Work Experience

---

<b>JobMingle</b> <i>Frontend Developer</i>	01/2024 to Present Lagos, Nigeria
---	--------------------------------------

- Designed and developed responsive & dynamic user interfaces using Next.js, leveraging server-side rendering (SSR) and static site generation (SSG) to improve performance and SEO for nationwide job board application.
- Implemented reusable, modular React components with TypeScript, optimizing code maintainability and scalability across projects. Integrated RESTful APIs endpoints for effortless data flow and real-time user interactions.
- Optimized performance using dynamic imports, code-splitting, lazy-loading, and efficient routing, reducing bundle sizes and enhancing navigation speed in single-page applications.
- Developed and secured authentication & authorization middleware with JWT and OAuth using different Single Sign On (SSO), aligning with modern security best practices.

<b>Tbanner Options Limited</b> <i>Frontend Developer (Remote)</i>	02/2021 to 12/2023 Lagos, Nigeria
--	--------------------------------------

- Developed a interactive sales management dashboard using React and Redux, providing real-time updates on sales performance, lead management, and pipeline status.
- Implemented role-based access control (RBAC) and authentication mechanisms to ensure secure access for sales managers, team members, and admins.
- Designed interactive charts and sales reports with Recharts offering data-driven insights into sales trends, team performance, and revenue forecasts.
- Optimized application performance through lazy loading and memoization, ensuring fast and flawless user experiences even with large datasets and high concurrent users.
- Integrated third-party CRM and marketing automation APIs to streamline lead tracking, customer interactions, and sales workflow automation.

## Projects

---

**Real Estate**  
[Project LINK](#)

- Designed and developed a responsive and user-friendly real estate website that facilitates land and property sales.
- Applied caching techniques for faster loading times and improved user experience.

- Ensured cross-platform compatibility using responsive design principles.

## Fashion Hub

[Project LINK](#)

- Created a mini modern e-commerce platform for a fashion brand using React.
- Designed visually appealing product pages and collections using Styled-Components and Tailwind CSS, ensuring brand consistency.

## Travel Tracking Platform

[Project LINK](#)

- Developed a travel tracking platform using React and React Router, enabling users to log and view their global adventures in an interactive map-based interface.
- Integrated location-based services using the Google Maps API, providing real-time geolocation tracking and enhancing user engagement with custom travel routes and destinations.
- Incorporated a user profile system to track past and future trips, connecting social media APIs for users to share their travel milestones directly.
- Optimized performance for fast access to trip data and location updates, using React Query for efficient data fetching and caching.

## Digital Banking

[Project LINK](#)

- Developed a demo sleek and intuitive digital banking platform using React and Redux, enabling users to manage their finances entirely online, from account management to transaction tracking.
- Designed and implemented a minimalist user interface, focusing on simplicity and ease of use to provide a seamless banking experience for users.

## Education

### Bachelor of Engineering

*Civil Engineering*

Federal University Oye Ekiti, Oye Ekiti, Nigeria

## Skills

- **Programming Languages:** JavaScript & TypeScript
- **Databases:** MySQL, Redis, MongoDB
- **Frameworks:** React, Nextjs, Bootstrap, Tailwind, Jest, Bootstrap, Supabase, Firebase, Express.js
- **Project Management & Collaboration:** ClickUp, Microsoft Team
- **Cloud Platforms:** AWS
- **Soft Skills:** Trouble Shooting, Problem solving, Mentorship & leadership, Time management, Code review, Research, Outspoken
- **Version Control:** Git
- **Authentication and Security:** JWT, Single Sign On (SSO) solutions (OAuth, OpenID Connect)
- **Operating Systems:** Linux, Windows

## Certifications

- [Federal University Oye-Ekiti](#) B.Eng Civil Engineering
- [FreeCodeCamp](#) JavaScript Data Structure & Algorithm
- [FreeCodeCamp](#) Responsive Web Design
